Learning Style

Learning Style

Visual & Kinesthetic

Moderate

Learners with a preference for the combined Visual and Kinesthetic style grasp concepts more effectively through direct interaction with learning materials. They thrive on engaging physically with tasks and benefit from the use of visual aids.

Examples:

- Engaging with interactive simulations and physical models.
- Using diagrams, flowcharts, and illustrative videos to understand complex concepts.

Aural

High

Aural learners absorb information best when it is presented verbally. They excel in environments where listening and discussion are encouraged and are adept at remembering spoken instructions.

Examples:

- Benefiting from lectures, group discussions, and verbal briefings.
- Using podcasts and audio recordings for learning new content.
- Participating in study groups or team meetings where ideas are discussed aloud.

- Participating in workshops where they can physically manipulate relevant materials.

Read/Write

High

Read / Write learners prefer to interact with information through written words. They excel in traditional study methods involving reading and taking detailed notes

Examples:

- Using textbooks, articles, and written handouts as primary study materials.
- Making comprehensive lists, writing out notes, and summarizing information
- Preferring email and text-based communication for clarity and record-keeping.

Cognitive Ability

Overall Cognitive Ability

High

Quantitative Knowledge

High

89.29%

Have good ability to reason numerical concepts and relationships and to manipulate numerical symbols. Can solve all the problems related to: basic arithmetic,

percentages, average, ratio and proportion, number sequences, graphs or tables, value comparison, combination problem.

Comprehensive Knowledge **High** **66.67%**

Have good acquired knowledge as well as ability to communicate knowledge and to reason using previously learned experiences or procedures. Can complete all the tasks related to: analogies, opposites, fill-in-the-blanks with the most appropriate words, general verbal information, language development, lexical knowledge, communication ability, grammatical sensitivity.

Visual Reasoning **High** **100%**

Have good ability to perceive, analyse and synthesize visual patterns and to think with visual patterns including the ability to store and recall visual representations. Can complete all the tasks related to: series completion with shapes or symbols, find the odd man out in a given set of shapes or symbols, visualization, rotation speed, closure speed, flexibility of closure, visual memory, spatial scanning, serial perceptual integration, length estimation, perceptual illusions, perceptual alternations, imagery.

Fluid Reasoning **High** **70.83%**

Have good ability to reason from concepts and solve problems using unfamiliar information or novel procedures. Can complete all the tasks related to: inductive reasoning, general sequential reasoning, Piagetian reasoning, quantitative reasoning, speed of reasoning.
